

Multimedia - Flash and Shockwave

Gamma Media provides a range of Flash and Shockwave services. Flash and Shockwave are used for creating highly animated, media rich interactive entertainment and are used in numerous ways across the internet. The major uses of flash and shockwave are:

- Adding Fluid Animation to a Website
- Complex Games and Interactive Presentations Online
- Viral Marketing and Promotional Material
- Advertising and Banner Propagation
- E-Learning, Training and Education

Flash and Shockwave animations may also be tied into a database and dynamic systems to create complex interactive productions.

Whether you need a simple animation to enhance your website or a complex interactive game for viral marketing, Gamma Media can provide you with a range of creative and technical flash solutions scaled to your needs.
