

Product Based

If you require a Product Based E-Commerce website we can offer three different solutions for you:

Bespoke Builds

There are occasions when the only solution is a complete build from the ground up. This could be because you have specific requirements that open source can not provide, or you want to have complete control over every feature of the website. Gamma Media can provide a range of bespoke E-Commerce solutions to fit your technology platform or aspirations for the website. We can build sites on a number of different platforms such as PHP/MYSQL, MSSQL/ASP, Ruby on Rails. For more information please contact us.

OS Commerce

OS Commerce is the largest Open Source E-Commerce systems and currently powers over 12,000 websites. OS Commerce is a robust and feature rich system with many new additions to the already huge list of features. OS Commerce has a huge list of powerful features including multi-lingual support, invoice control and complete website administration from an easy to use interface. For more information please contact us.

Vitruemart and Joomla

If your website is a magazine/E-Commerce website requiring an integration of content management and e-commerce functionality then Joomla combined with Virtua Mart is the perfect solution. Combining the CMS power of Joomla with Virtua Mart ensures complete control over editorial and sales combined within one package. Virtumart is a fully featured e-commerce system, for more information please contact us.

There is also a great online article [comparing the two systems](#).
