

## Social Networks

Social network applications provide you with a range of options whether you are deploying a Facebook/YouTube clone or need a private network to maintain good communications between managers on projects.

A few examples of our social network offerings include:

- Music and Video sharing with on the fly encoding.
- Dating Sites
- Social Galleries
- Internal corporate communities for staff.
- Project based collaborative systems.
- Live Chat and Internet Video Conferencing
- News Aggregation Sites liked [www.digg.com](http://www.digg.com)
- Corporate or personal blogs.
- Development of applications for sites such as Facebook.

The platforms we consider to be both stable and powerful for delivery are Dolphin Web Community and Elgg.

Dolphin is suited to a more commercial deployment and has a range of powerful media rich capabilities. For a complete list of features please [click here](#) .

Elgg is far better suited for collaborative projects, academic or non-profit organisations. With an emphasis on content and learning elgg provides a unique, clean, information rich approach. For more information about Elgg please [click here](#) .

Both of these systems can be tied into hierarchical membership and subscription plans.

### Bespoke Builds

There are occasions when the only solution is a complete build from the ground up. This could be because you have specific requirements that open source can not provide, or you want to have complete control over every feature of the website. Gamma Media can provide a range of bespoke Social Network solutions to fit your technology platform or aspirations for the website. We can build sites on a number of different platforms such as PHP/MYSQL, MSSQL/ASP, Ruby on Rails. For more information please contact us.
